

## NOCTUA NA-SAVP5

The NA-SAVP5 chromax is a fan accessory set consisting of 16 NA-AVP5 anti-vibration pads for up to 2 compatible 92/80mm fans (see compatibility info). Made from extra-soft silicone, the NA-AVP5 pads minimise the transmission of minute vibrations while maintaining full compatibility with standard fan screws and most other mounting systems.

### Vibration dampening for lower noise emission

Fans can transmit minute vibrations to the PC case, CPU cooler or other devices they're installed in, which can lead to annoying resonance noises. The NA-AVP5 pads can help to reduce the transmission of structure-borne noises and thus lower your PC's overall noise level.

### Extra soft and highly tear-proof

The use of premium-grade silicone makes the NA-AVP5 pads both extra soft and highly tear-proof, allowing them to combine efficient decoupling with excellent longevity and ease of use.

### Compatible with many Noctua 92/80mm models

The NA-AVP5 pads are compatible with many popular Noctua 92mm and 80mm fan models and are particularly suited for colour-coordinating black chromax & industrialPPC models to specific build themes. Please see our compatibility information for details.

### Chromax colour choices

Maximising colour choices, Noctua's chromax accessories give users the option to colour-customise their fans in order to create PC builds with specific, focused aesthetics. Red, blue, green, yellow, grey, black and white versions make it possible to match today's most popular build colour schemes.

*The NA-AVP5 anti-vibration pads are compatible with the Noctua fans listed here. Please note that the NA-AVP5 pads cannot be used with other fans and are not compatible with third-party fans.*
