

NOCTUA NA-SAVP3 chromax.yellow

Anti-vibration pads

The NA-SAVP3 chromax.yellow is a fan accessory set consisting of 16 yellow NA-AVP3 anti-vibration pads for up to 2 compatible round 140mm fans such as the NF-A15 (see compatibility info). Made from extra-soft silicone, the NA-AVP3 pads minimise the transmission of minute vibrations while maintaining full compatibility with standard fan screws and most other mounting systems. At the same time, the chromax.yellow edition is ideal for adding yellow accents to Noctua's NH-D15 chromax.black or chromax line fans in order to colour-coordinate them with individual build themes.

Vibration dampening for lower noise emission

Fans can transmit minute vibrations to the PC case, CPU cooler or other devices they're installed in, which can lead to annoying resonance noises. The NA-AVP3 pads can help to reduce the transmission of structure-borne noises and thus lower your PC's overall noise level.

Extra soft and highly tear-proof

The use of premium-grade silicone makes the NA-AVP3 pads both extra soft and highly tear-proof, allowing them to combine efficient decoupling with excellent longevity and ease of use.

Compatible with many Noctua round frame 140 models

The NA-AVP3 pads are compatible with many popular Noctua 140mm fans with round frames such as the NF-A15 PWM or NF-A15 HS-PWM chromax.black.swap. Please see our compatibility information for details.

chromax.yellow edition

Maximising colour choices, Noctua's chromax accessories give users the option to colour-customise their fans in order to create PC builds with specific, focused aesthetics. Red, blue, green, yellow, grey, black and white versions make it possible to match today's most popular build colour schemes.

Product name

Noctua NA-SAVP3 chromax.yellow

EAN

9010018200966

UPC

841501120961

Packaging dimensions (HxWxD)

150x110x27mm

Weight incl. packaging

61g

Warranty

6 years

Packaging unit

40 pcs

Packaging dimensions / unit (HxWxD)

320x320x240mm

Weight incl. packaging / unit
