

NA-SAVP3

Noctua NA-SAVP3 16x Anti-Vibration Pads

The NA-SAVP3 is a fan accessory set consisting of 16 brown NA-AVP3 anti-vibration pads for up to 2 compatible round 140mm fans such as the NF-A15. Made from extra-soft silicone, the NA-AVP3 pads minimise the transmission of minute vibrations while maintaining full compatibility with standard fan screws and most other mounting systems. At the same time, the original brown version is ideal for adding subtle brown accents to Noctua's NH-D15 chromax.black or chromax line fans.

The NA-AVP3 anti-vibration pads are compatible with the Noctua fans listed here: NF-A15 PWM, NF-A15 HS-PWM chromax.black.swap, NF-A15 HS-PWM chromax.black (included with NH-D15 chromax.black). Please note that the NA-AVP3 pads cannot be used with other fans and are not compatible with third-party fans.

Vibration dampening for lower noise emission

Fans can transmit minute vibrations to the PC case, CPU cooler or other devices they're installed in, which can lead to annoying resonance noises. The NA-AVP3 pads can help to reduce the transmission of structure-borne noises and thus lower your PC's overall noise level.

Extra soft and highly tear-proof

The use of premium-grade silicone makes the NA-AVP3 pads both extra soft and highly tear-proof, allowing them to combine efficient decoupling with excellent longevity and ease of use.

Compatible with many Noctua round frame 140 models

The NA-AVP3 pads are compatible with many popular Noctua 140mm fans with round frames such as the NF-A15 PWM or NF-A15 HS-PWM chromax.black.swap. Please see our compatibility information for details.

LOGISTICAL DATAS

Product name

Noctua NA-SAVP3
