

NOCTUA NM-i17xx-MP78 chromax.black

Mounting Kit

The NM-i17xx-MP78 is a SecuFirm2™ mounting upgrade kit that allows Noctua CPU coolers with 78mm mounting pitch to be upgraded to Intel's latest LGA1700 (LGA17xx family) platform. True to the SecuFirm2™ tradition, it combines outstanding reliability, optimal contact pressure and easy, straightforward installation in order to enable Noctua users to continue using their heatsinks on Intel's latest Core series processors. The chromax.black version with its all-black parts is a perfect match for Noctua's chromax.black line heatsinks.

For Noctua coolers with 78mm mounting pitch

The NM-i17xx-MP78 kit is compatible with a wide range of Noctua CPU coolers that use 78mm mounting pitch, whereas heatsinks with 83mm mounting pitch must use the MP83 version. Please refer to our detailed compatibility information to check which kit is right for your cooler.

Tailor-made for LGA1700 (LGA17xx family)

Aiming to cut costs, many manufacturers use cross-platform parts for both Intel and AMD, which can cause compatibility issues. Noctua's SecuFirm2™ mounting system for LGA1700 (LGA17xx family) has been tailor-made for this socket in order to ensure optimal compatibility and ease of installation.

chromax.black version

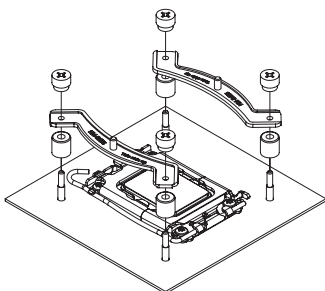

With all-black mounting bars and thumb screws, the chromax.black versions of the NM-i17xx kits are ideal for upgrading chromax.black line coolers. Featuring the same premium grade coating as the original mounting parts, they allow maintaining the same consistent black stealth design.

Backwards compatibility

Noctua CPU coolers are renowned for being safe, long-term investments that can be used for several CPU generations. Accordingly, even coolers that are 8 years or older can be upgraded to the latest Intel Core platform using this mounting kit.

NM-i17xx-MP78 chromax.black MOUNTING KIT SPECIFICATIONS

Socket compatibility Intel LGA1700 (LGA17xx family)

Caution: This mounting upgrade kit makes it possible to install a Noctua heatsink, which has originally been designed for other sockets according to their specifications, on LGA1700 (LGA17xx family) hardware. As the clearance specifications for LGA17xx differ from other sockets, it is crucial to verify that your heatsink is fully compatible with your LGA17xx motherboard before installation. Please consult our compatibility database (LGA1700 motherboards will be added when available) in order to make sure that your motherboard is fully compatible with your heatsink.

Please note that the NM-i17xx-MP78 kit is only compatible with heatsinks that have 78mm mounting pitch and that the NM-i17xx-MP83 kit must be used for heatsinks with 83mm mounting pitch.

LOGISTIC DATA

Product name
Noctua NM-i17xx-MP78 chromax.black

EAN
9010018201093

UPC
841501121098

Packaging dimensions (HxWxD)
152x111x30 mm

Weight incl. packaging
206 g

Warranty
6 years

Packaging unit
60 pcs

Packaging dimensions / unit (HxWxD)
326x323x352 mm

Weight incl. packaging / unit
13.02 kg

SCOPE OF DELIVERY

- Black NM-i17xx-MP78 chromax.black mounting kit
