

NM-i115x-1200

NM-i115x-1200 NOCTUA MOUNTING KIT

Continuing Noctua's tradition of supplying customers with its premium-class SecuFirm2™ mountings free of charge, the NM-i115x-1200 kit allows Noctua users to upgrade their coolers to Intel's LGA1200 & LGA115x sockets (LGA1150, LGA1151, LGA1155, LGA1156). The NM-i115x-1200 set is backwards compatible with most Noctua coolers since 2005 and has been designed to combine outstanding reliability, optimal contact pressure and easy, straightforward installation. Bringing the trusted SecuFirm2™ quality to Intel's LGA1200 & LGA115x platform, the NM-i115x-1200 is an enthusiast-grade mounting kit that meets the highest demands in safety, performance and ease-of-use.

Trusted SecuFirm2™ quality

Over the years, SecuFirm2™ has become synonymous with impeccable long-term stability and flawless craftsmanship. Enthusiast users and industry clients alike trust the time-tested quality of Noctua's professional mounting systems.

Perfect contact pressure

SecuFirm2™ mounting systems use high-grade coil springs to achieve perfect contact pressure. No guesswork regarding how far to tighten the mounting screws, no risk of damaging the socket with excessive pressure!

Integrated fastening brackets

Noctua's SecuFirm2™ systems feature fully integrated fastening brackets with pre-fixed pressure screws and springs, which greatly facilitates the installation process. No fiddling with loose screws and springs!

Tailor made for LGA115x/1200

In order to cut costs, many manufacturers use cross-platform parts for both Intel and AMD, which can cause compatibility issues. Noctua's NM-i115x-1200 kit has been tailor-made for LGA115x/LGA1200 and strictly complies to the Intel keep-out zones in order to ensure 100% compatibility.

One-piece backplate with fixed struts

The NM-i115x-1200 kit features a new, sturdy one-piece backplate with fixed struts that has been specifically designed to facilitate installation on LGA115x/LGA1200 sockets. Due to the fixed struts, it's now even easier to align the backplate and to attach it to your mainboard.

Backwards Compatibility

The NM-i115x-1200 SecuFirm2™ kit is fully backwards compatible with most Noctua coolers since 2005, making them safe long-term investments that can be used for several CPU generations.

Socket- & Cooler - Compatibility

Socket compatibility	LGA115x (LGA1150, LGA1151, LGA1155, LGA1156) LGA1200
