

NV-MPG1-12.brown

Multi-Purpose Gasket for 120mm Fans

The NV-MPG1-12 is a multi-purpose anti-vibration gasket for Noctua 120x25mm fans (see fan compatibility) that is ideal for placing a fan on top of A/V receivers, DVRs, video game consoles, stereo equipment, routers, home radiators or other devices that have ventilation holes on top and can benefit from extra airflow. Made from heat-proof silicone rubber, it efficiently prevents vibrations from being transmitted and, at the same time, seals the gap between the device and the fan, which reduces leak flows and thereby ensures optimum cooling performance regardless of whether the fan is placed to assist exhausting hot air or to blow cold air into the device. By introducing a 10mm offset between the fan and the device, the NV-MPG1-12 also reduces influx turbulence in exhaust applications, which can often yield a significant improvement in both airflow and acoustics. Thanks to the integrated mounting pins, fixing the gasket to compatible Noctua fans is a breeze. Additionally, optional NA-FG1-12 fan grills can be installed if required.

Tight seal for maximum efficiency

The NV-MPG1 not only prevents the transmission of vibrations, but also acts as a gasket that creates a tighter seal between the fan and the device it's placed on. Reducing leak flows between the fan and the device, the NV-MPG1 thereby ensures maximum ventilation efficiency.

Offset for optimal exhaust performance and acoustics

When a fan is placed on top of a device exhausting air, drawing air through the devices' ventilation holes may create unpleasant turbulence noises and reduce the fan's efficiency. By introducing a 10mm offset between the fan and the device, the NV-MPG1 can reduce influx turbulences significantly, thereby improving both airflow performance and running smoothness.

Anti-vibration design

Made from thick, soft silicone rubber and featuring a thin rib on the device side, which creates a smaller contact area and therefore further reduces the transmission of vibrations, the NV-MPG1 has been designed to suppress vibrations from the ground up.

Ideal for top exhaust applications

Thanks to the offset and seal that the NV-MPG1 creates, it is ideal for installing top exhaust fans on devices that have ventilation holes on the top side. Typical examples include computers, game consoles, amplifiers, receivers, DVRs and other audio/video equipment, but the NV-MPG1 can also be used to significantly increase the energy efficiency of wider home radiators by placing fans on top.

Easy installation

Thanks to the integrated mounting pins and lips, installing the NV-MPG1-12 on compatible Noctua 120mm fans such as the NF-A12x25, NF-F12 or NF-S12A, NF-P12 series is a breeze: Simply press the gasket onto the fan until the pins go through the mounting holes and the lip wraps around the corners of the fan. Done!

Ideal with Noctua's USB-powered 5V fans

When it comes to installing fans anywhere in your home, office or other environments, the NV-MPG1 is an ideal match for use with Noctua's USB-powered 5V PWM fans. Unlike many cheap USB fans, Noctua's award-winning premium fans are built to last and come with a 6-year manufacturer's warranty.

NV-MPG1-12.brown SPECIFICATIONS

Colour	Brown
Fan compatibility	Compatible with most square 120x25mm Noctua fans
Warranty	6 years

LOGISTIC DATA

Product name
Noctua NV-MPG1-12.brown

EAN
9010018900088

UPC
841501190087

Packaging dimensions (HxWxD)
25.5x143x139 mm

Weight incl. packaging
116 g

Warranty
6 years

Packaging unit
60 pcs

Packaging dimensions / unit (HxWxD)
311x428x309 mm

Weight incl. packaging / unit
7.50 kg

SCOPE OF DELIVERY

NV-MPG1-12.brown multi-purpose gasket
