### INCLUDED PARTS

NA-HCF2 fixture

NA-HCC1 steel clip

NA-HC3 cover

NA-HCi inlays

### ! Caution

The covers increase the height of the heatsink by 5mm (from 160 to 165mm) and the width by 3mm (from 150mm to 153mm). Please make sure that your case offers sufficient clearance and that the covers don't make contact with any other components such as PCIe cards!

! If your CPU cooler is not yet installed, please first install the heatsink and attach the fan(s) to the heatsink as described in the cooler manual.

**1** Put the fixtures on top of the heatsink's two fin-stacks.

**2** Attach the fixture to the heatsink using the steel clip. Note that the steel clips must go underneath the second fin from the top.

**3** Choose two colour inlays, remove the protective films and put them into the covers.

**4** Slide the covers over the fin-stacks until the magnets snap into place. Verify that the covers are sitting firmly on the cooler.

### ! Warranty and Support

Even with high-grade products and strict quality control, the possibility of defects cannot be eliminated entirely. Therefore, we aim at providing the highest possible level of reliability and convenience by offering a warranty period of 6 years and direct, fast and straightforward RMA service.

Should you encounter any problems with your NA-HC3 chromax.black.swap heatsink cover, please don't hesitate to contact our support team ([support@noctua.at](mailto:support@noctua.at)).
