

Dear customer,

Thank you very much for choosing a Noctua NA-STPG1.

The NA-STPG1 is a simple yet highly effective means to preclude thermal paste build-up in the cut-outs of the heatspreader of AMD AM5 CPUs.

Combined with the ten included NA-CW1 cleaning wipes, the NA-STPG1 set gives you everything you need to keep your AM5 processor clean.

Yours sincerely,

  
Roland Mossig, Noctua CEO

## Included mounting parts:

NA-TPG1 Thermal paste guard

10x NA-CW1 cleaning wipes

## 1 Installing the thermal paste guard

If there are residual traces of thermal paste or thermal pads on your CPU, please clean them off first using the included NA-CW1 wipes.

Then, place the NA-TPG1 thermal paste guard onto the CPU.

Make sure that the inner opening of the guard is correctly aligned with the outer edges of the heatspreader:

## 2 Applying the thermal paste

Apply 5 small dots; 4 small dots with ~ 2mm diameter near the corners plus 1 dot with 3-4 mm diameter in the centre:

AMD AM5

**Caution:** Applying too much thermal paste will lower heat conductivity and cooling performance!

## 3 Fastening the heatsink to the CPU

Finally, complete the installation of the CPU cooler using the instructions located in the CPU cooler manual.

## ! Support and FAQs
